

SYSTEM REQUIREMENTS

- Internet connection 1 Mb/s or better (broadband recommended)
- For broadcaster: speakers and microphone, optional camera
- For viewers:: speakers, optional microphone and camera

SUPPORTED BROWSERS

- Google Chrome version 55 and later
- Safari 9 and later (with plug-in) 11 and later (without plug-in)
- Opera version 44 and later
- Mozilla Firefox version 50 and later
- Microsoft Edge 16 and later
- IE version 11 and later
- Vivaldi all versions
- Yandex version 16

BANDWIDTH REQUIREMENTS

The bandwidth used by LiveWebinar will be optimized for the best experience based on the participants' network. It will automatically adjust for 3G, WiFi* or Wired environments.

*We do not recommend connecting by 2.4 WiFi because of radio noise and bluetooth interference that can lower your connection quality

Recommended bandwidth for Online Events:

- For 1:1 video calling 500kb/s (upload/download)
- For group video calling: 500 kb/s (download) oraz 1 Mb/s (upload)
- For screen sharing only: 50kb/s (download) oraz 200kb/s (upload)
- For audio VoiP: 50kb/s

Recommended bandwidth for single broadcast viewers:

- For 1:1 video calling 500 kb/s (download)
- For screen sharing only: 50-200kb/s (download)
- For external streaming source only: 0.5-1.5 Mb/s (download)
- For audio VoiP: 50kb/s (download)

FIREWALL CONFIGURATION

For LiveWebinar work correctly, the following ports need to be open in your firewall:

- 443/TCP (required)
- 10000-20000 / UDP + TCP (optional, recommended)

*All parameters are default and may vary depending on the configuration of the Enterprise account.
